

# Energy Transition Research

The world must quickly transition to a clean energy economy to be carbon neutral by 2050. Fossil fuel companies are at a crossroads in the face of investor pressure, regulation, and competition from renewables. The **Carbon Underground Transition Research** helps investors evaluate these companies and align their portfolios with Net Zero.

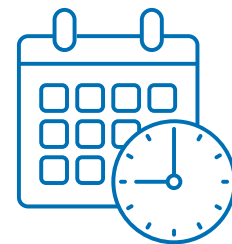

Industry-focused data and metrics that help determine which fossil fuel companies are taking part in the energy transition.

Assess and monitor fossil fuel companies based on their climate commitments, emissions, operations, investments and assets.

Flexibility to select the elements and measures needed for custom mandates or proprietary scoring models.

Timely updates sourced by energy sector experts with experience in sustainable investing and corporate reporting.

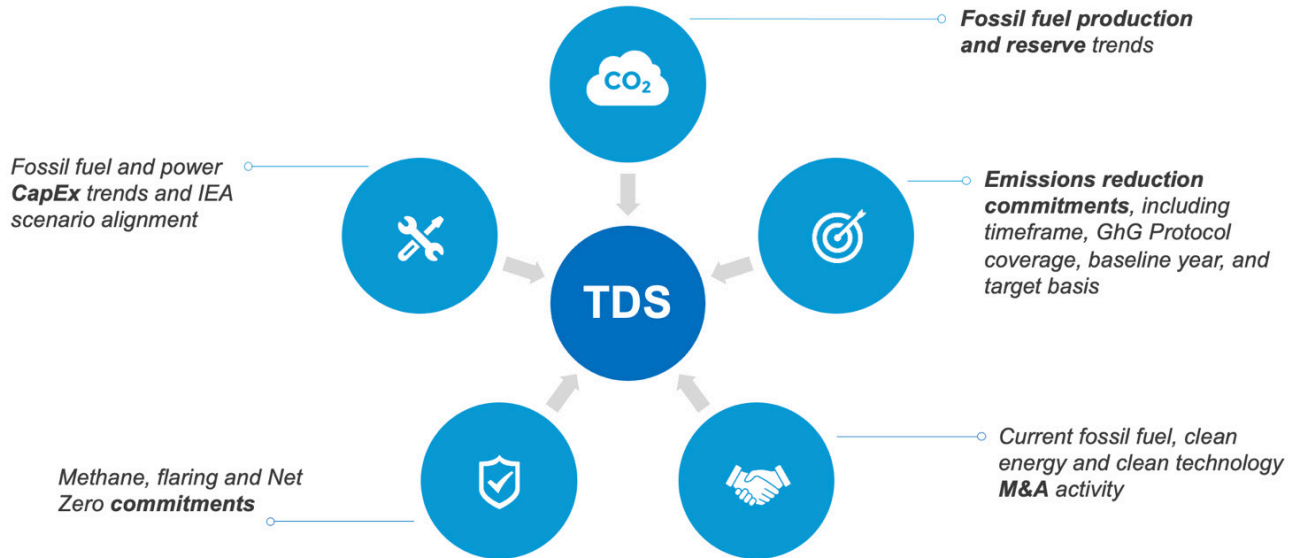

Our transition solutions are delivered as operational files through The **Carbon Underground Transition DataSet** service and through custom company research and advisory.

Investors, asset managers, wealth managers and investment consultants use the transition data, metrics and reports to:

- Evaluate and track companies for possible divestment or investment
- Enhance ESG and Net Zero scoring frameworks
- Support and enhance fundamental equity or credit research
- Identify areas for shareholder engagement
- Create investment products and strategies

## Rich Data & Performance Metrics

The Carbon Underground Transition DataSet (TDS) includes 12 key metrics and 50+ data fields for companies on The Carbon Underground Oil & Gas 100, the oil and gas constituents of The Carbon Underground 200™.

## THE CARBON UNDERGROUND TRANSITION RESEARCH

This research extends The Carbon Underground 200™, our globally-recognized emissions and rankings data. It is an evolution of our commitment to provide comprehensive carbon research and analytics that address stakeholder-aligned portfolio mandates and the development of sustainable investment products.

## About FFI Solutions

FFI Solutions is a climate-focused research, analytics and advisory firm that delivers custom solutions to facilitate sustainable investment, ESG and Net Zero strategies. Asset owners, advisors and asset managers rely on our products and services to efficiently achieve their portfolio decarbonization objectives.
